DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 14, 2008 has been entered.

Claims 1,2,5-9 are pending in the instant application.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, 'the coating built up from at least two layers, intermediate layer applied directly to molybdenum and following layer' as claimed in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2,5-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 1 the limitation reciting 'the layer of coating that is applied directly to the molybdenum is an intermediate layer composed of a mixture of nitrides and carbides' fails to point out and distinctly claim the subject matter since the coating (as recited in the claim) comprises at least one oxide from among Fe_2O_3 , and at least one of a nitride or a carbide and does not include mixture of nitrides and carbides and hence renders the claim indefinite.

Claims 2,5-9 are rejected because of their dependency status from claim 1.

Furthermore claim 1 recites the limitation "that of the following layer" in line 14. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Application Publication 2003/0102805 to Hataoka et al. discloses a small difference in thermal expansion coefficients of the two materials reduces compressive stress and thus improves sealing. JP 63021739 A to Sato et al. discloses high pressure discharge lamp using conductive material of carbide where the thermal expansion coefficient of the compound depends upon the mixing ratio of carbide. USPN 6,624,576 to Mittler discloses coating on molybdenum foil in a discharge lamp.
